

Telepresence Multimodal

Face-to-face interactions with agents via Video Kiosks

Multimodal Kiosk

Kinetic Kiosk

3500

Scan the QR code to contact an agent and complete the registration form. You can speak through your smartphone while interacting here.

- 
- A man with a beard and mustache, wearing a dark blue suit, white shirt, and a red patterned tie, is holding a black smartphone to his ear. He is smiling slightly and looking towards the camera. The background is a blurred car dealership with several cars on display, including a red sports car. The lighting is bright and modern.
- 🖥️ Video Kiosks
 - 📞 Direct Video Call
 - 📞 Digital Call
 - 💬 WhatsApp...

Users connect via their own **smartphones** for high-quality audio and privacy. The digital screen is a medium for viewing the agent or a screen shared in real time.

Teleassistance Telesupport Telesales

Advisors, supervisors, and salespeople can work from laptops, computers, tablets, Macs—all they need is a web browser and Internet access!

The new generation of multimodal kiosks (type 2) are easier to maintain, have no internal intelligence, and operate with an Android OS, Web View, or Smart TV.

In the event of a technical failure (network, hardware, webcam, etc.), they can continue to operate in camera-free mode or via a fixed backup QR code, which can be a sticker similar to a PUK.
