1. Installation

To install the Webclient Button in your web-page you need to download the webcall widget and uncompress it in the **root directory** of your web page. It is important that you **keep the original name of the folder**.

2. How to insert it into the web

To insert it into your web, you first need to add the CSS Stylesheet file to your webpage.

```
<link rel="stylesheet" href="webcall_widget/assets/webcall_widget.css">
```

Then you need to insert the main JavaScript file of the widget.

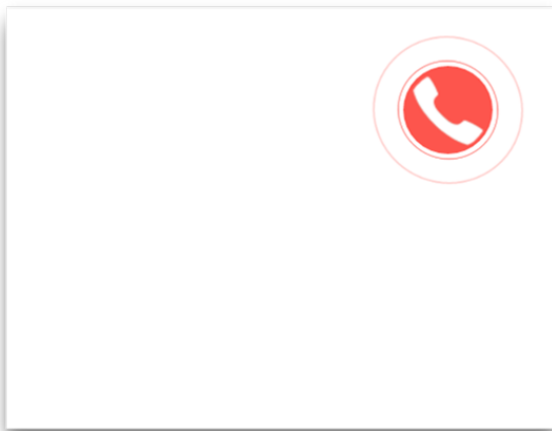

```
<script src="webcall_widget/webcallWidget.js"></script>
```

Finally you need to create a new WebcallWidget.

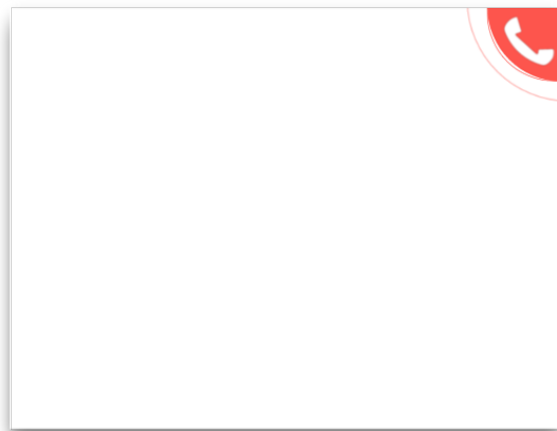

```
<script type="text/javascript">  
  var webcallWidget = new WebcallWidget('WEBPHONE_URL', 'DESIGN', 'ALIGN', 'COLOR');  
  webcallWidget.create();  
</script>
```

3. Available configurations

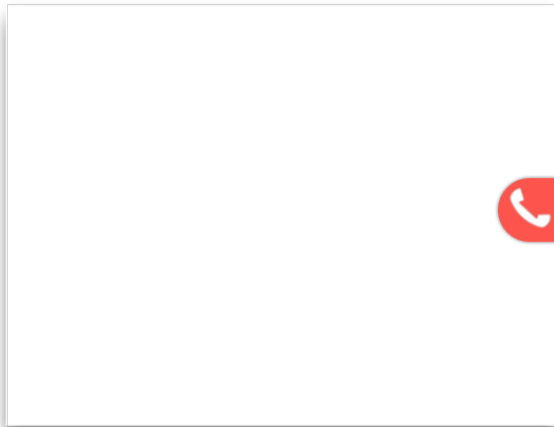

Design selection:

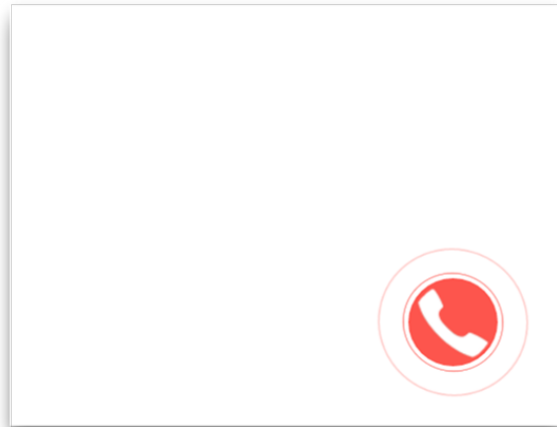

top

top-corner

middle

bottom

Horizontal align selection:

- **right:** to append it to the right of the web page
- **left:** to append it to the left of the web page

Color selection:

You can insert any color code that is compatible with HTML and CSS.

4. Widget API

WebcallWidget

```
new WebcallWidget(webphone_url, design, align, color) → {Object}
```

Represents the Webcall Widget Button

Parameters:

Name	Type	Description
webphone_url	string	The url to the webphone to open
design	string	The design that the button will have ('top','top-corner','middle','bottom')

align	string	Horizontal align of the button ('right','left')
color	string	HTML valid color code to decorate the button

Methods

`(inner) changeColor(new_color)`

To switch the current color of the button

Parameters:

Name	Type	Description
new_color	string	HTML valid color code

`(inner) changeDesign(new_design)`

To switch the current design of the button

Parameters:

Name	Type	Description
new_design	string	The new button design ('top','top-corner','middle','bottom')

`(inner) changeHorizontalAlign(new_align)`

To switch the horizontal align of the button

Parameters:

Name	Type	Description
new_align	string	Horizontal align ('right','left')

`(inner) create()`

It starts the Webcall Button and displays it into the web
