Voice · Video · Cloud Communications

Smart IVR

Carrier-grade IVR platform, with exceptional performance, scalability, reliability and application multi-tenancy. Its distributed architecture can efficiently process hundred of simultaneous calls.

Video RTC

Video Gateways for advanced Real-time Communications on existing Contact Centers. Multi-channel coverage for Web Browsers, Mobile devices and IoT.

Cloud Hosting

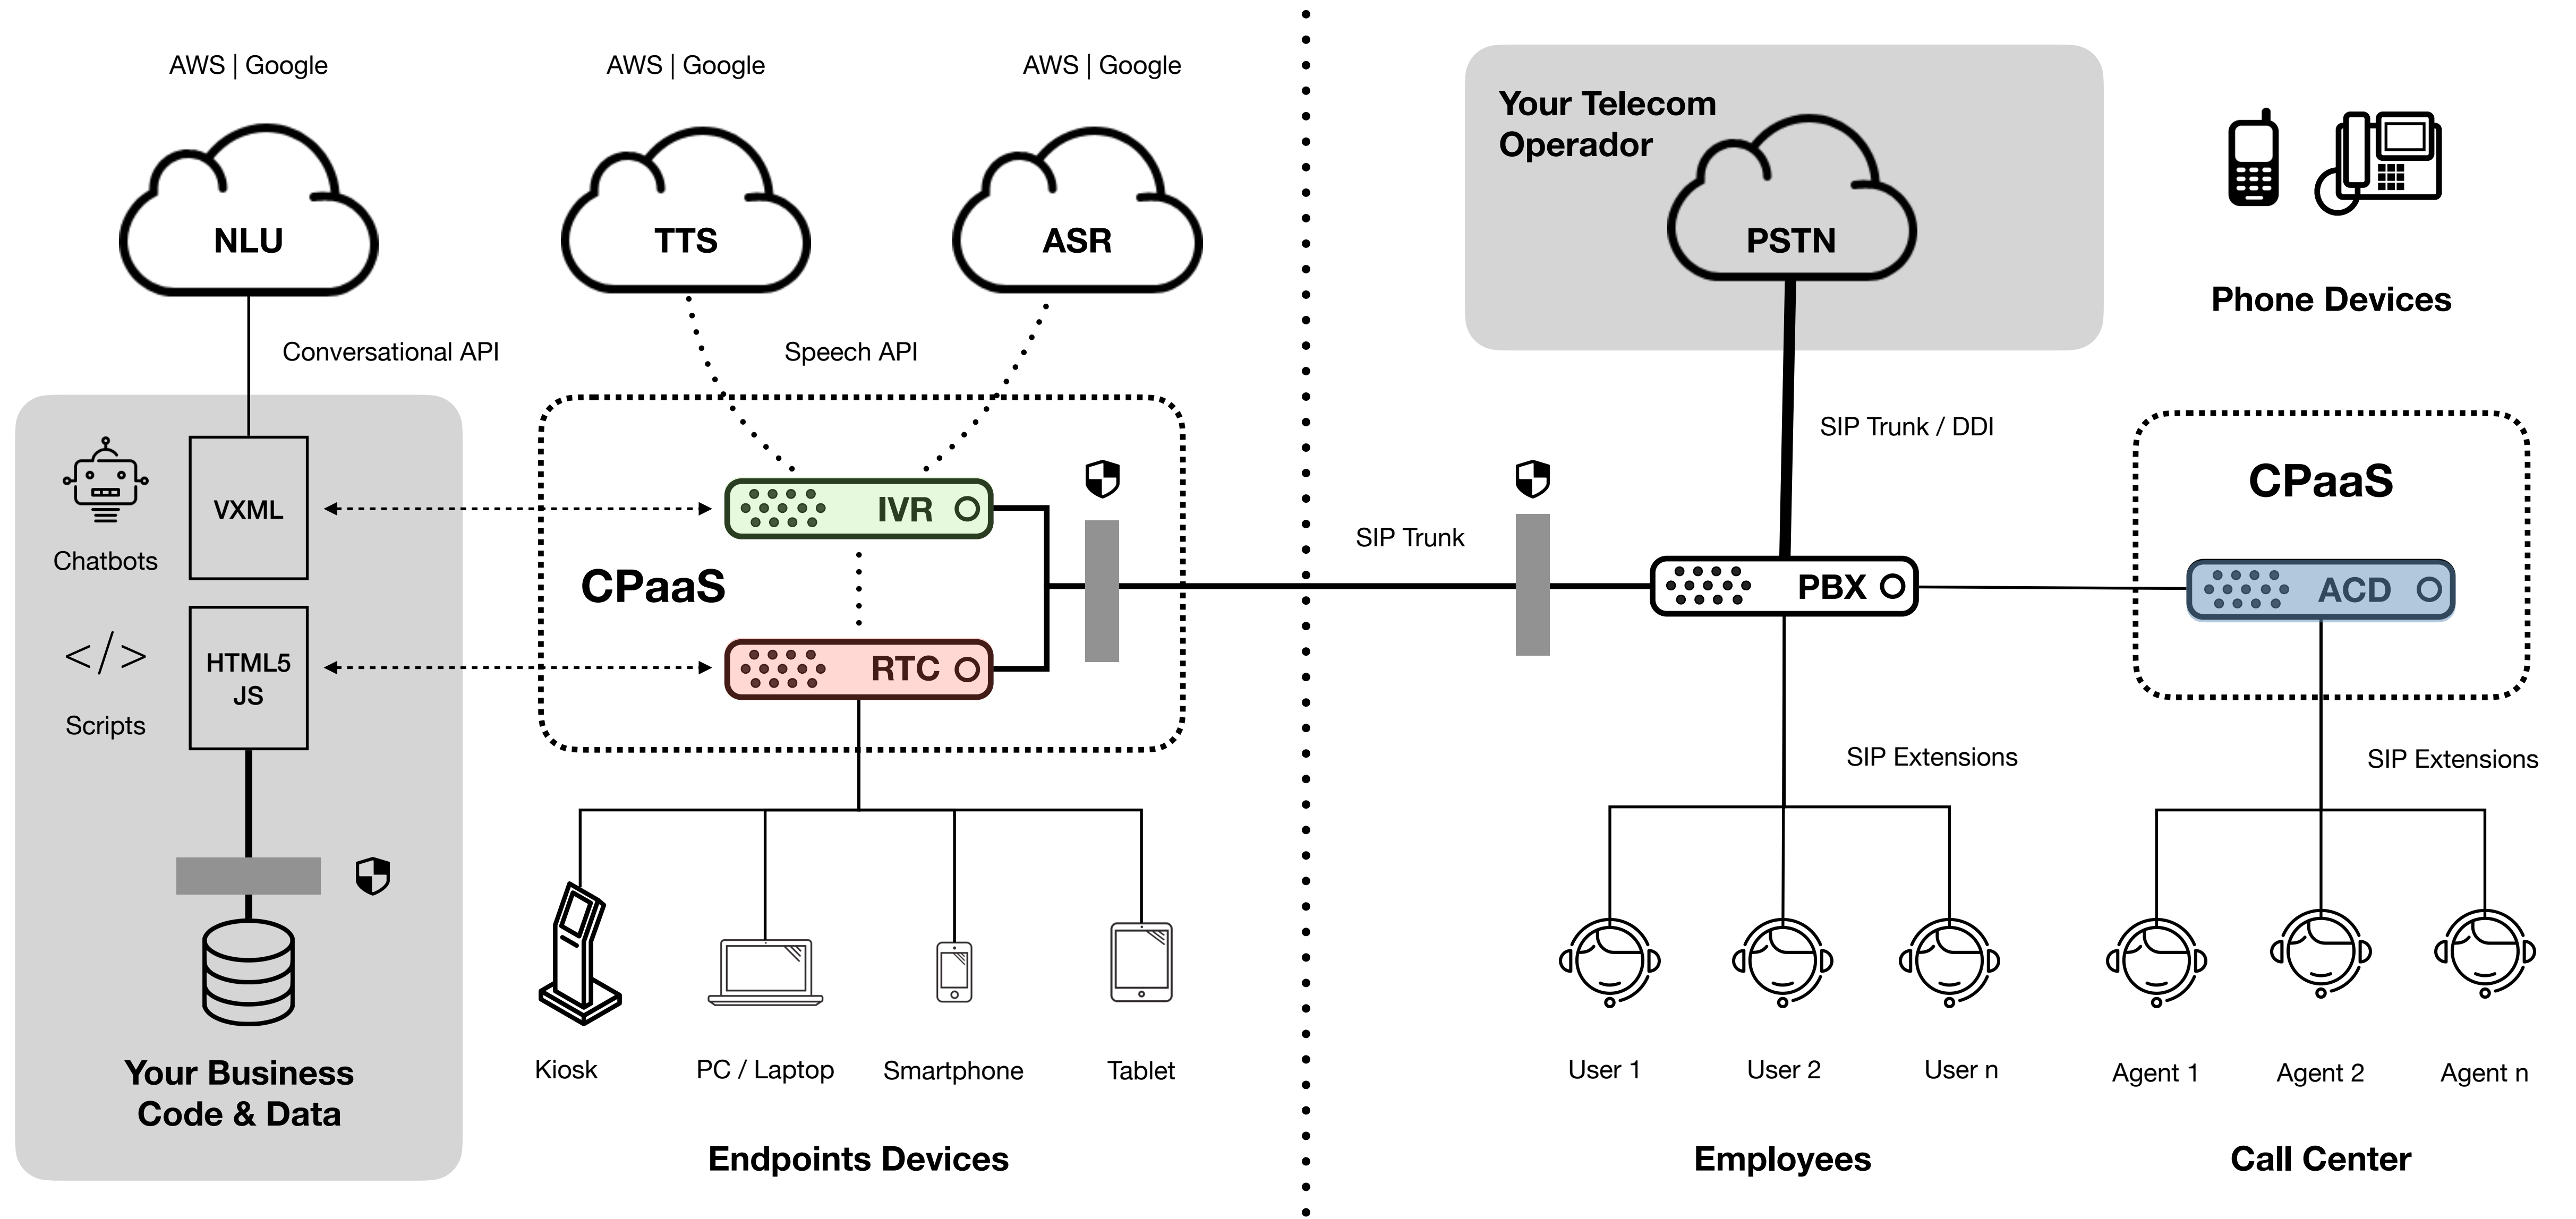

For enterprises that need real-time communications without IT investments. Run Smart IVR and Video RTC platforms in the most secure and scalable cloud computing environments in the market.

Solutions

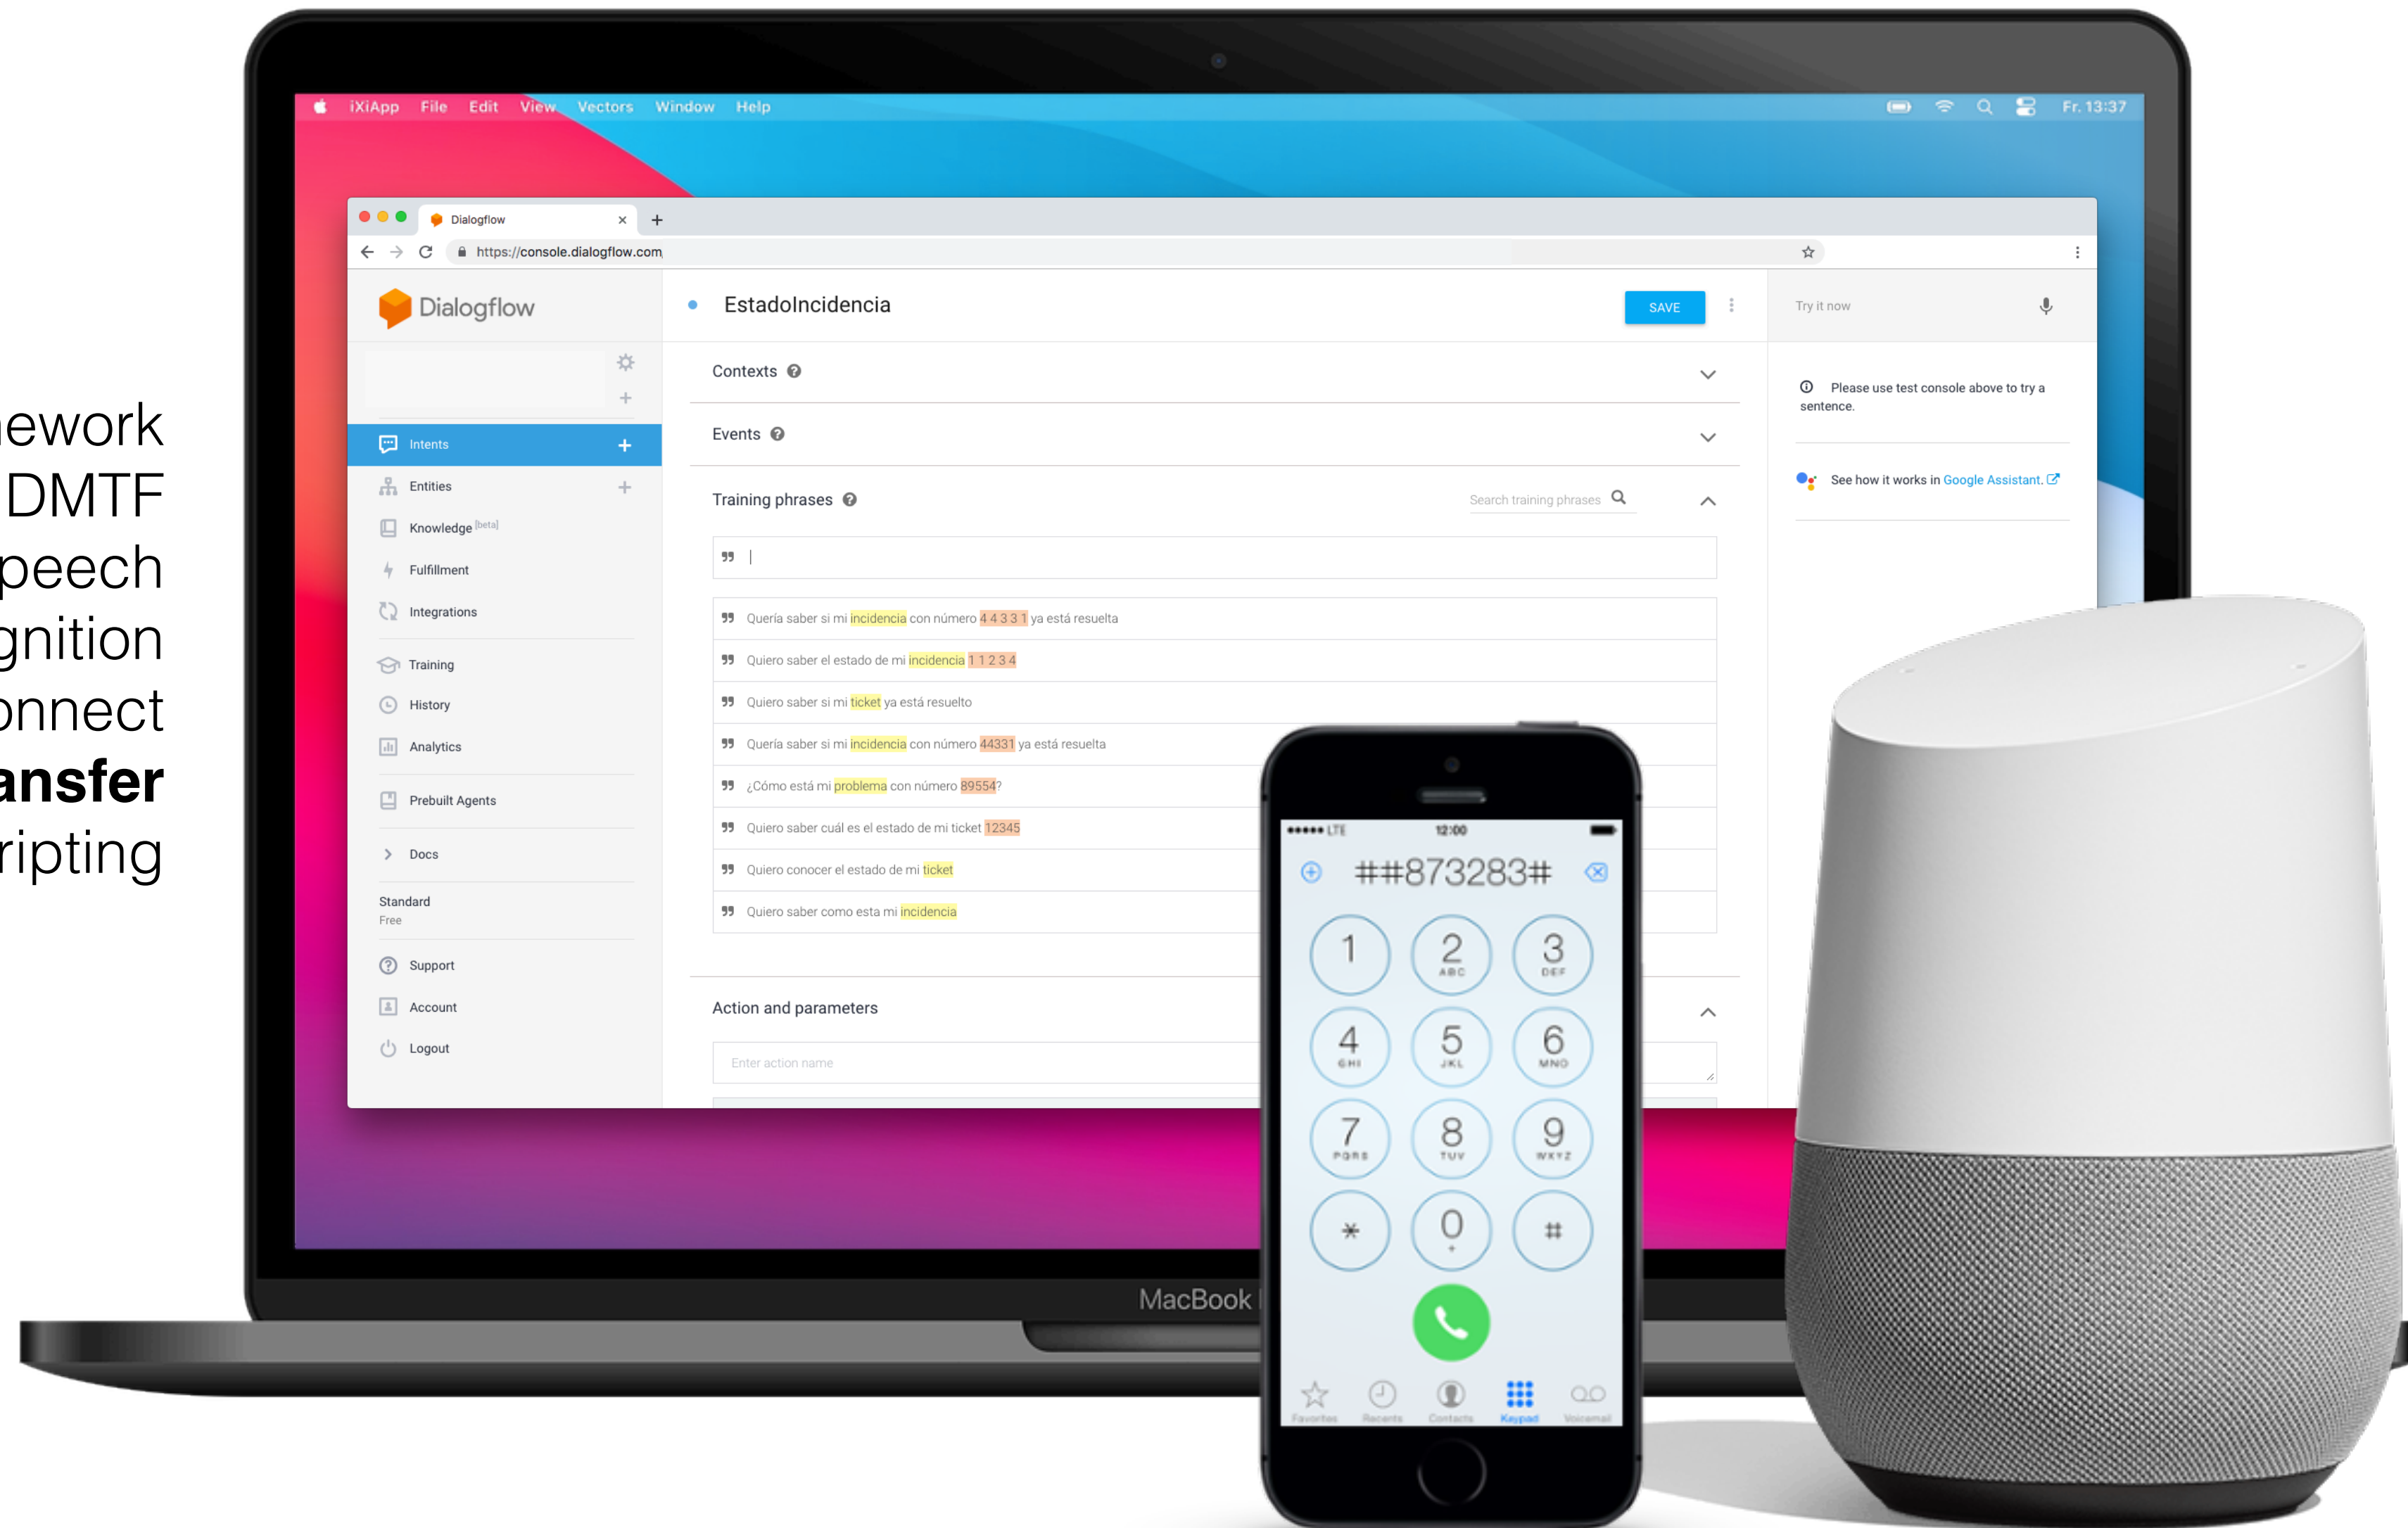

Complementary Software that offers flexibility and deliver significant savings to business processes or service providers. These applications can be standalone or used in combination.
