Calling from any Web Browser

webphone.ivrpowers.com

IVR**Powers**

Streamline your business
communications
Peer-to-Peer

Connect your Webclient
to another Webclient to
make peer-to-peer calls
from web browsers.

Phone Number

Connect your Webclient
to your own handling or
celular phone number
for a monthly fee.

SIP Trunk

Connect your Webclient
to your PBX or Call
Center with a SIP trunk
configuration.

Run over any Desktop Web Browser

Your visitors can easily call from their own Desktop Web Browsers like Google Chrome, Mozilla Firefox, MS Explorer, MS Edge, Apple Safari, Opera for Windows, MacOSX or Linux operating systems.

No SPAM, No Ads, No Phone Number

Dialing a PSTN phone number won't be required anymore to reach your PBX, IVR or Call Center. Remember, new consumers trends don't recommend to leave personal phone number in an Internet form to avoid SPAM, Ads...

No Roaming issue

Common "Click-to-Call" solutions are not useful when your visitor's phone is in Roaming or under a foreign wireless network. More and more consumers are traveling or cannot receive a phone call anywhere.

A phone is not required

Your web visitor may don't want to make or receive a phone call to talk with you. Don't cut the web channel interaction, lets your visitors contact you from the same point where they are browsing in your page.

100% free of charge for your Clients

Avoid any call cost for your website visitors when they need to contact your company directly. They will appreciate having no charge, no tolls, no doubts... Using the Internet bandwidth and a web browser is always free of charge.

Call Buttons without any coding required

Select and insert a call button on the corner or side of your website easily, with our HTML simple code sample. It's a 100% cloud based service without any installation or configuration.

Customizable Look&Feel

Customize by yourself your Webclient webphone (widget HTML) setting your color brand and logo. Just set the sample code / parameters and go!
